Joint Staff J-7

JCA Lineage

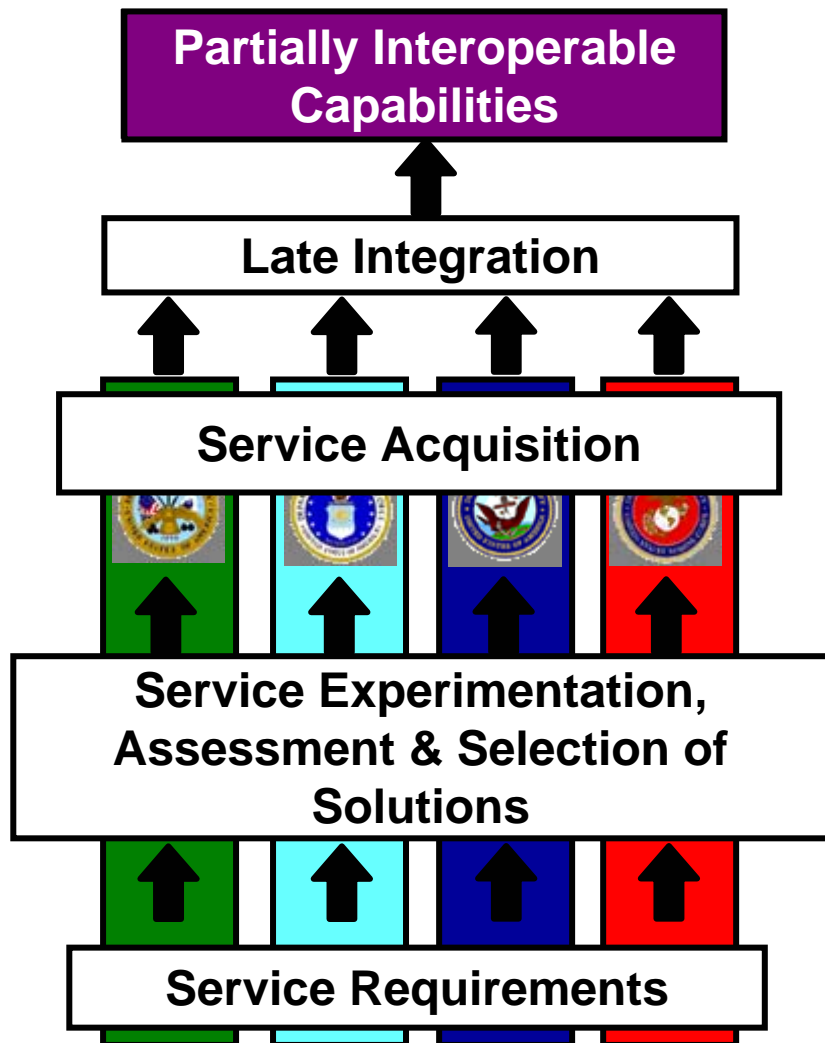

Aldridge Study

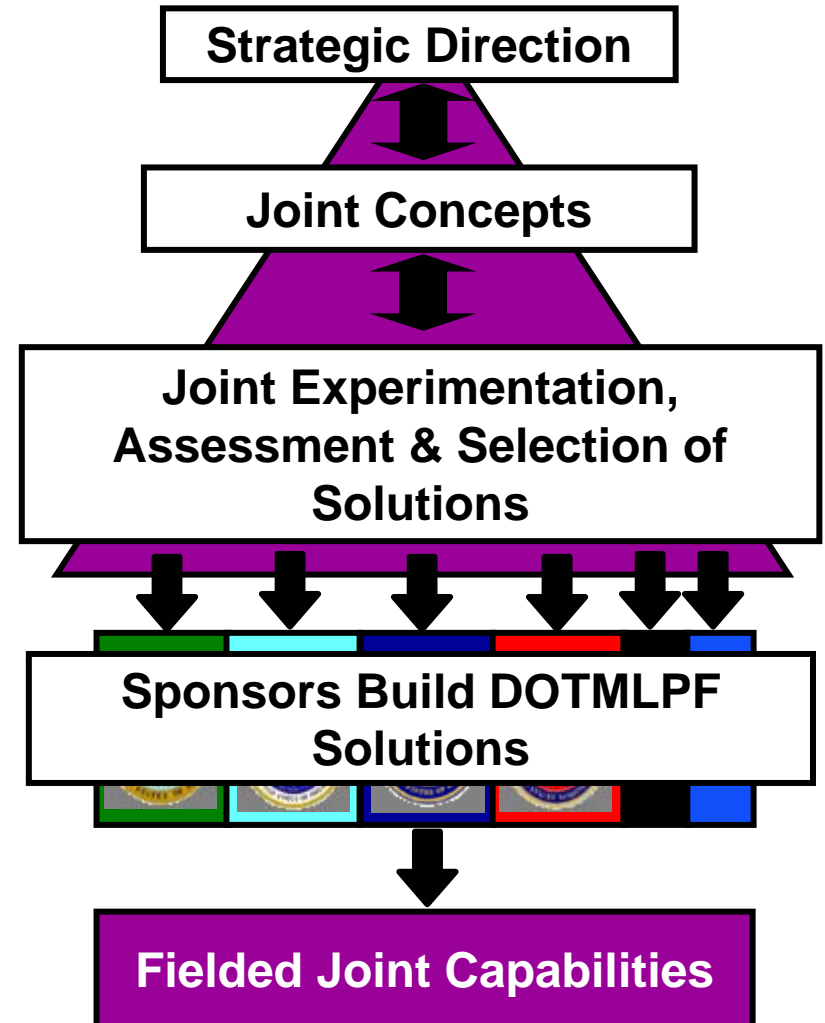

Capabilities Based Approach

Bottom-Up Threat Based

Top-Down Capabilities Based

CBP Process Objectives

A top-down, competitive process that weighs options vs. resource constraints across a spectrum of challenges

- **Link DoD decision-making to the Defense Strategy**
 - Apportion risk across external challenges – traditional, irregular, catastrophic, and disruptive
 - At the level of portfolios and current/future concepts
- **Inform risk tradespace – identify joint capability gaps, redundancies, and opportunities**
- **Facilitate the development of affordable capability portfolios that:**
 - Hedge against uncertainty
 - Increase costs to adversaries while suppressing our costs
- **Integrate and synchronize the requirements process, PPBE, and the acquisition system**

JCAs... What Are They?

**“...integral part of the evolving Capabilities-Based Planning process...the beginnings of a common language to discuss and describe capabilities across many related Department activities and processes.”
(SecDef Memo, 6 May 2005)**

**JCAs are collections of like DOD activities functionally grouped to support capability analysis, strategy development, investment decision making, capability portfolio management, and capabilities-based force development and operational planning.
(JCA Baseline Reassessment Terms of Reference)**

JCA Intent

JOINT DEFENSE CAPABILITIES STUDY TEAM

Joint Defense Capabilities Study
Final Report

December 2003

“Develop a capability portfolio framework, building on the Joint Capability Area re-baseline effort...”

“...these manageable groups provide a common lexicon to compare Service contributions to joint warfighting and enterprise support and, therefore, support cross-Service trades.”

DEPUTY SECRETARY OF DEFENSE
1010 DEFENSE PENTAGON
WASHINGTON, DC 20301-1010

MAR 15 2007

MEMORANDUM FOR SECRETARIES OF THE MILITARY DEPARTMENTS
CHAIRMAN OF THE JOINT CHIEFS OF STAFF

SUBJECT: Institutional Reform and Governance Actions to Critical Path (ACP)

Improving governance within the Department of Defense is essential. The Department needs to move toward a general management framework that provides clear and executable strategic direction for the current, mid and far term.

The Deputy's Advisory Working Group (DAWG) recently approved a series of six steps to move the Department toward governance success. These steps, referred to as ACP, are designed to meet desired objectives, while leveraging existing Department-wide efforts. Each ACP (attached) has a statement of expectation, specific actions to be undertaken, an established timetable, and a designated action lead (with supporting organizations). The Institutional Reform and Governance Co-leads, Ken Krieg and Lieutenant General Skip Sharp, shall continue to monitor these actions and report progress and issues to the DAWG.

Andrew England

THE SECRETARY OF DEFENSE
WASHINGTON, DC 20301-1000

JCS

“As an integral part of the evolving Capabilities-Based Planning process...Joint Capability Areas representing the beginnings of a common language to discuss and describe capabilities across many related Department activities and processes.”

DEPUTY SECRETARY OF DEFENSE
1010 DEFENSE PENTAGON
WASHINGTON, DC 20301-1010

MAR 27 2007

MEMORANDUM FOR SECRETARIES OF THE MILITARY DEPARTMENTS
CHAIRMAN OF THE JOINT CHIEFS OF STAFF
UNDER SECRETARIES OF DEFENSE
COMMANDERS OF THE COMBATANT COMMANDS
ASSISTANT SECRETARIES OF DEFENSE
DIRECTORS OF THE DEFENSE AGENCIES
DIRECTORS OF THE DOD FIELD ACTIVITIES

SUBJECT: Joint Capability Areas (JCAs)

The JCAs are fundamental to establishing a common language to support the many DoD capabilities-based planning processes. To broaden JCA use as a framework for capability management throughout the Department, the following tasks are assigned:

- The Institutional Reform & Governance Execution Roadmap co-leads will outline how best to use JCAs across the Department.

describe capabilities across many related Department activities and processes.

Although I recognize this lexicon needs further development, I encourage you to begin using the Joint Capability Areas where appropriate. The attached action items address specific tasks. A copy of the briefing is included for your information.

staff will conduct a base line update to the Deputy's Advisory Group and provide the necessary manpower and analytical support to the Deputy's Advisory Group.

Andrew England

What Problem Does JCAs Address?

- **DOD processes currently talk in five different languages...**
 - Policy talks in terms of strategic priorities
 - Programming talks in terms of appropriations and PEs
 - Planning talks in terms of force packages
 - Acquisition talks in terms of cost, schedule and performance parameters
 - Requirements talks in terms of capabilities and gaps
- **You cannot have an enterprise-wide capabilities-based strategy-to-task discussion without a common language**
- **JCAs have provided a rudimentary language which have some traction, but fall short of being**

DoD's Capabilities-Based Planning "Rosetta Stone"

Military Support to Stabilization, Security, Transition, and Reconstruction Operations Joint Operating Concept

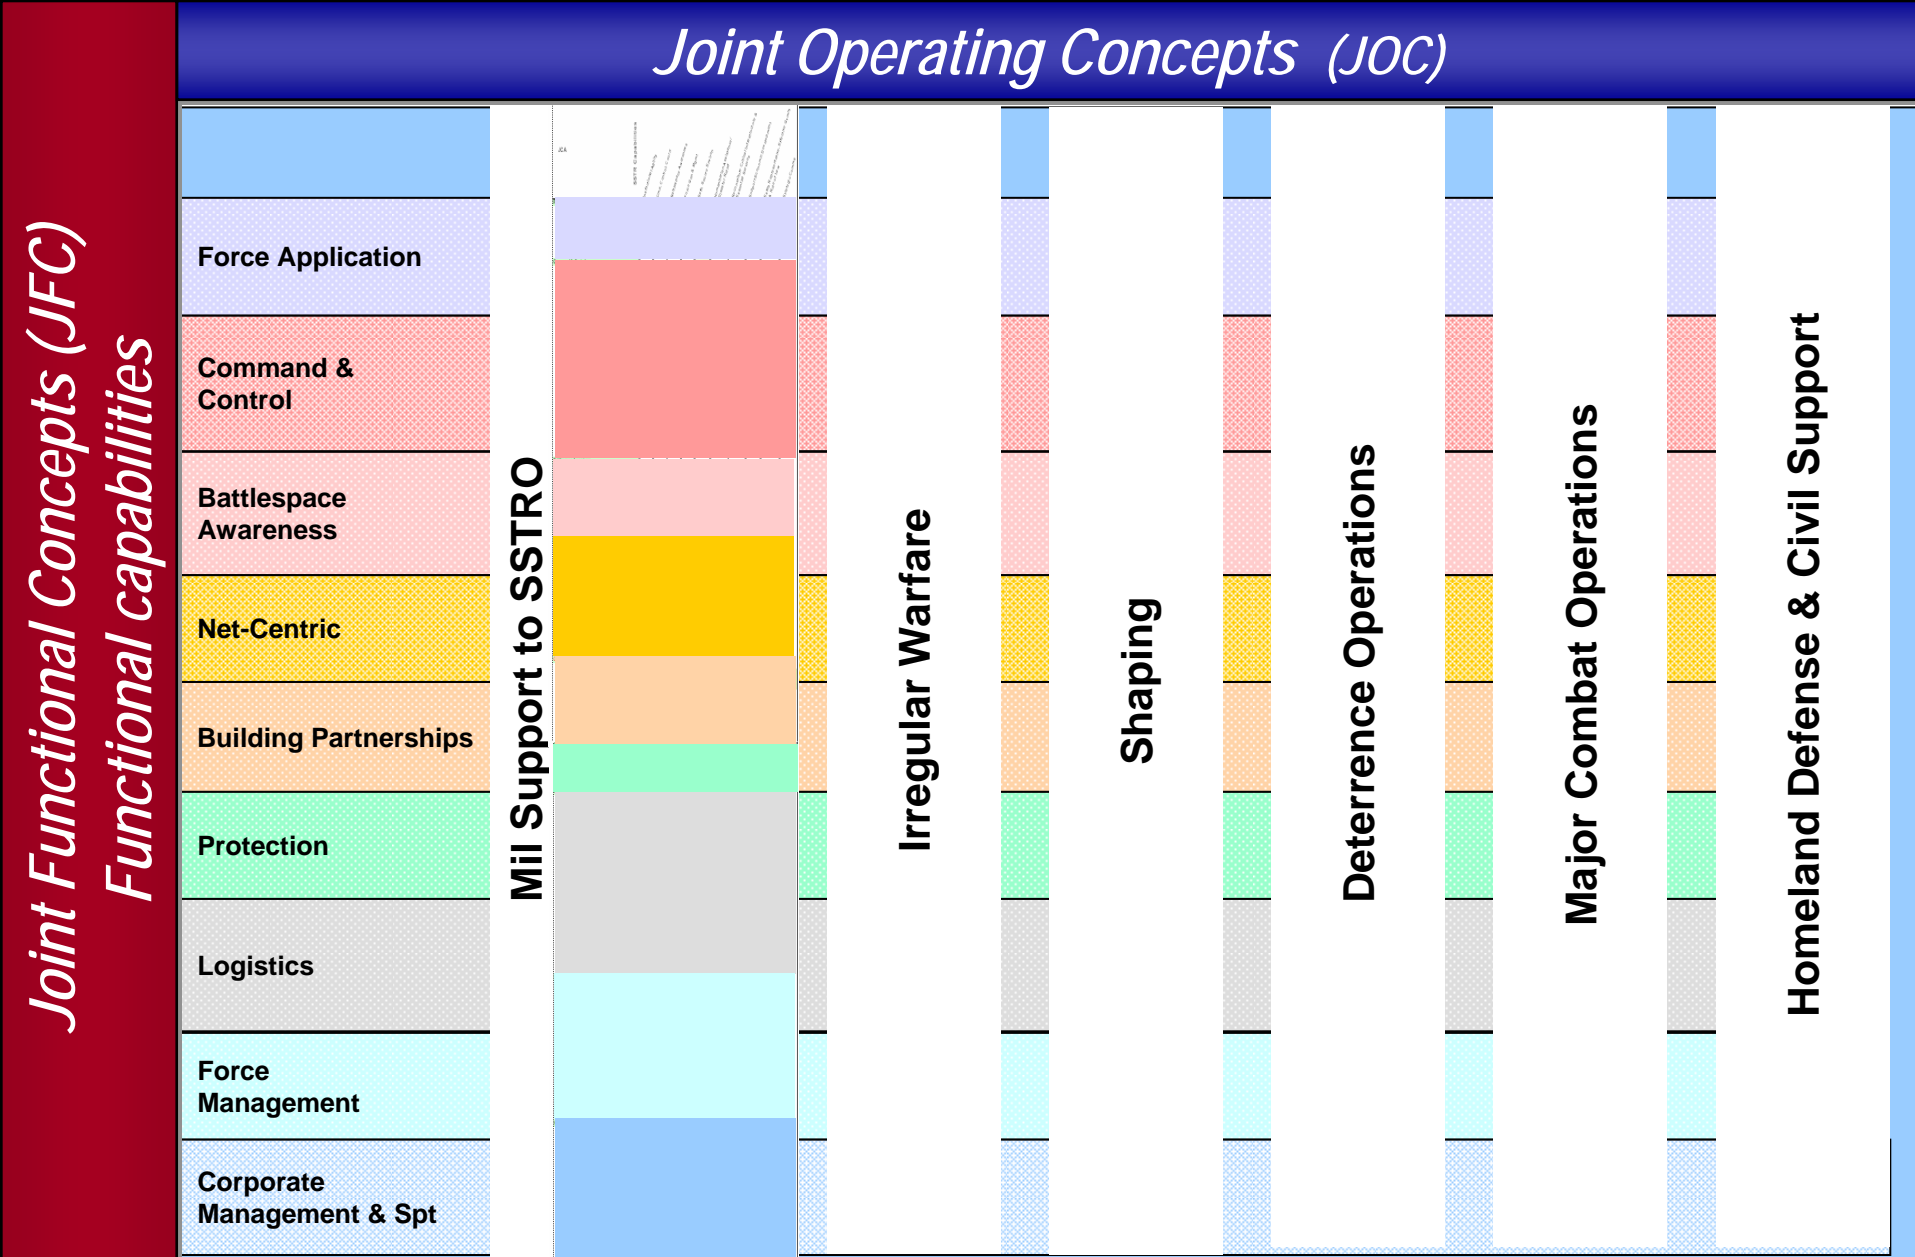

Version 2.0

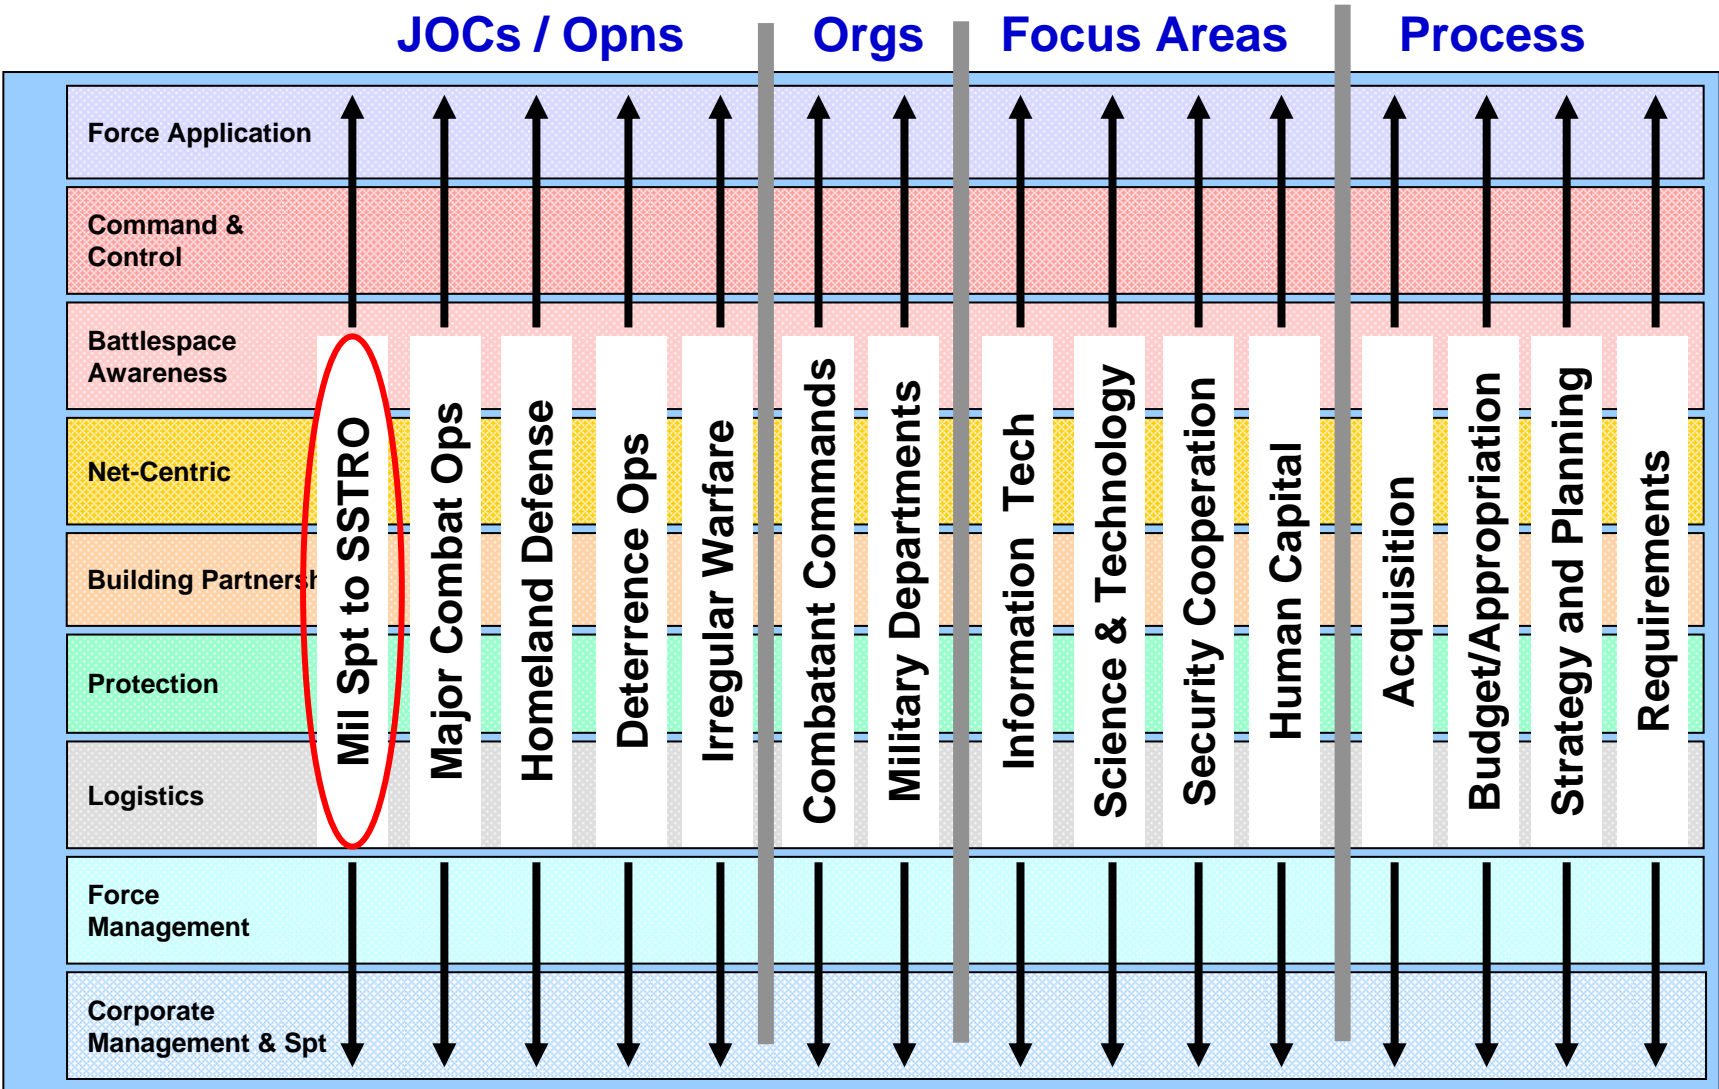

December 2006

Appendix C-2: Joint Capability Area Matrix

SSTR Capability	Most Relevant JCA(s)		Comparison - Implications
	Tier 1	Tier 2	
U.S. Government Institutional Agility. U.S. government institutions must be able to distribute funds, goods, and services rapidly and efficiently to successfully conduct SSTR operations	Joint Command & Control Joint Logistics Joint Shaping Joint Stability Operations Joint Interagency/IGO/N GO Coordination	Exercise Command Leadership; Manage Risk Joint Deployment/Rapid Distribution; Agile Sustainment; Joint Theater Logistics; Multinational Logistics Building Military Partner Capability; Building Military Partner Capacity Basic Services Restoration; Humanitarian Assistance; Reconstruction All Tier2 Joint IAGOMNNGO Coordination JCAs	JCAs don't specifically address distribution of funds
The ability for DOD to systemically plan, program, budget, and allocate funds for SSTR operations	Joint Force Management	Future Capability Identification; Planning	JCAs don't cover PPB&E cycle
The ability for U.S. commanders to have access to contingency funds that can be spent in a flexible and adaptive manner.	Joint Force Management	Future Capability Identification; Planning	JCAs don't cover PPB&E cycle
The ability for U.S. commanders to rapidly bring to bear reliable, expert foreign and domestic contractor support a wide variety of SSTR undertakings.	No Tier1 JCAs	No Tier2 JCAs	JCAs don't address contingency funds; ties to Tier2 Restoration of Basic Services under Joint Stability Operations.

[illegible]

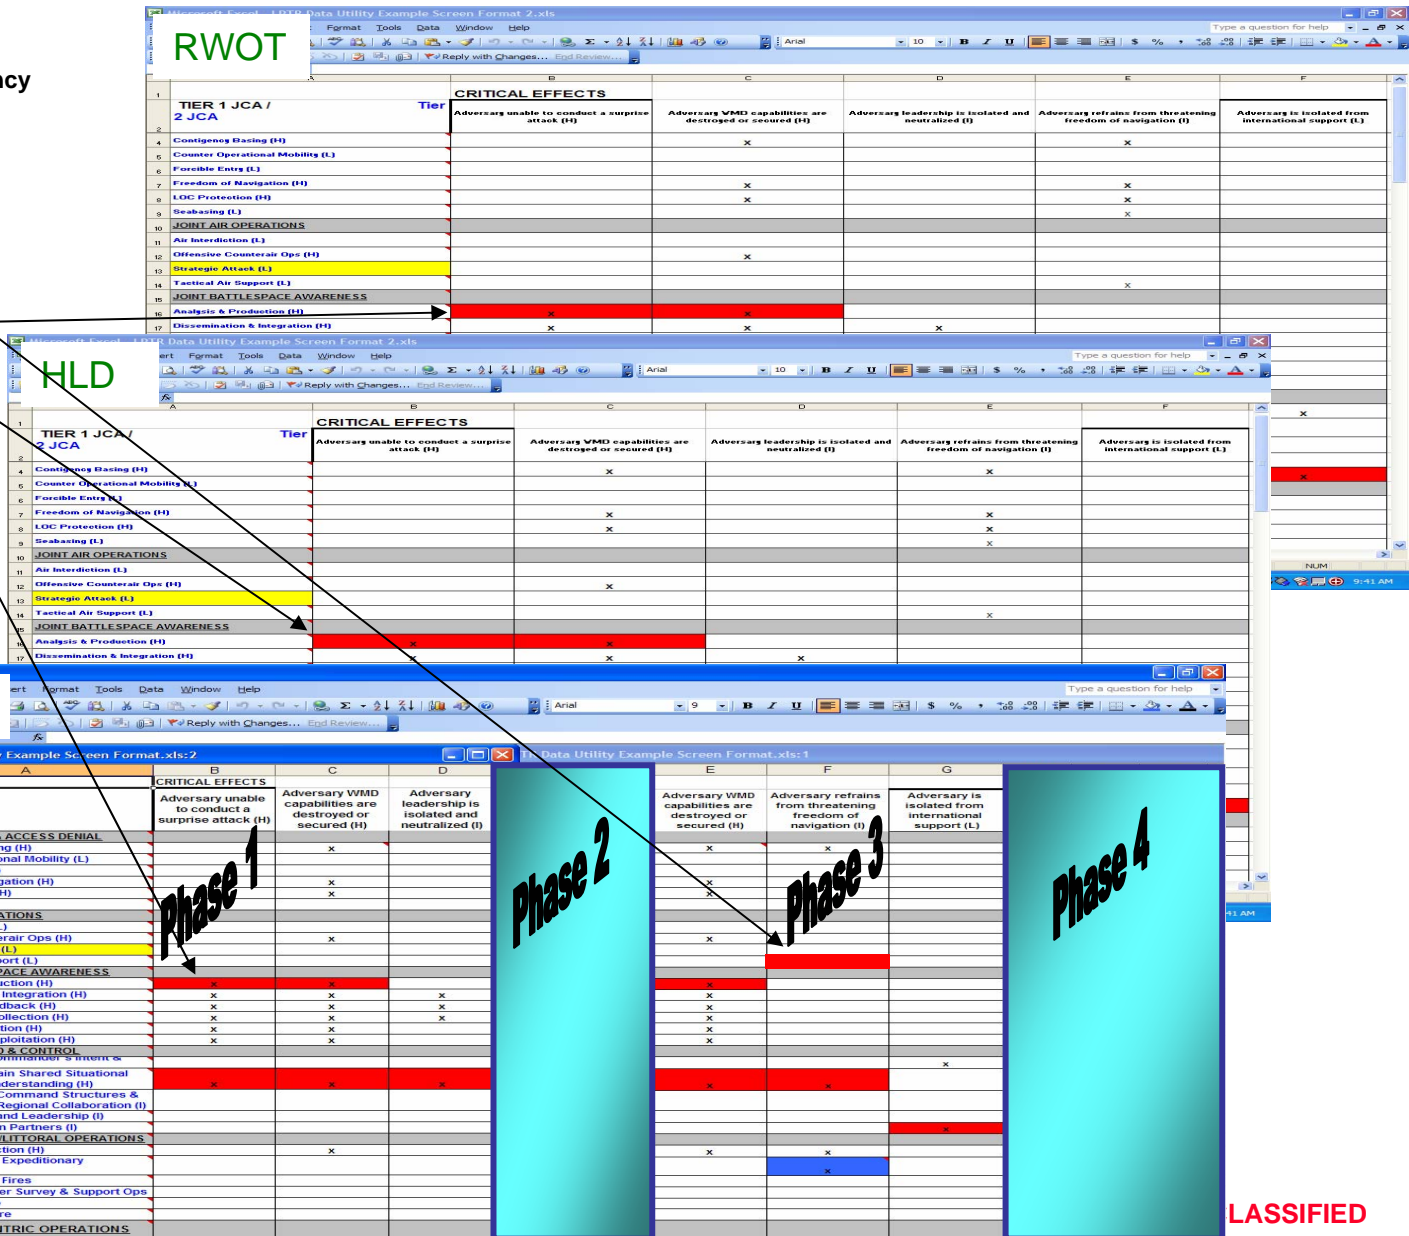

Functionally aligned JCAs simplify the framework & increases utility across DOD by facilitating cross-referenced views by operations, components, processes, and activities

LPTR : Informing Apportionment of Risk & Resources Across Plans

- Capability Shortfall
- Capability Excess / Redundancy
- Capability Sufficiency

Rather than reduce mission risk by mitigating this capability gap, a Commander may prefer to reduce theater risk by mitigating this capability gap that is shared across multiple missions.

Similarly, a Commander can look across multiple missions to identify areas in which to accept increased risk that have minimal theater-wide impact.

- For each major system, determine capability contribution to each JCA by scenario (1-n)
- Assess total capability contribution (supply) against OPLAN (demand) by scenario

Illustration of the Preemptive Goal Programming Solution Space – Robust Solution across Capabilities

Problem Data:

		Rate of Contribution to Capability		
		C1	C2	C3
System	Platform 1	10	0	20
	Platform 2	10	5	0

Priority	Goal
1st	C2 \geq 10
2nd	C1 \geq 20
3rd	C3 \geq 20
4th	C1 \geq 30

Weighted Goal Program

Feasible Region Formed by Budget Constraint

Preemptive Goal Program

Feasible Region Reduced by First Goal

Weighted Goal Program: Table of Corner Solutions

		Systems		Capability Levels		
		Platform 1	Platform 2	C1	C2	C3
Solutions	S1	2	0	20	0	40
	S2	0	4	40	15	0

Note: Each solution has **best** and **worst** capability values.

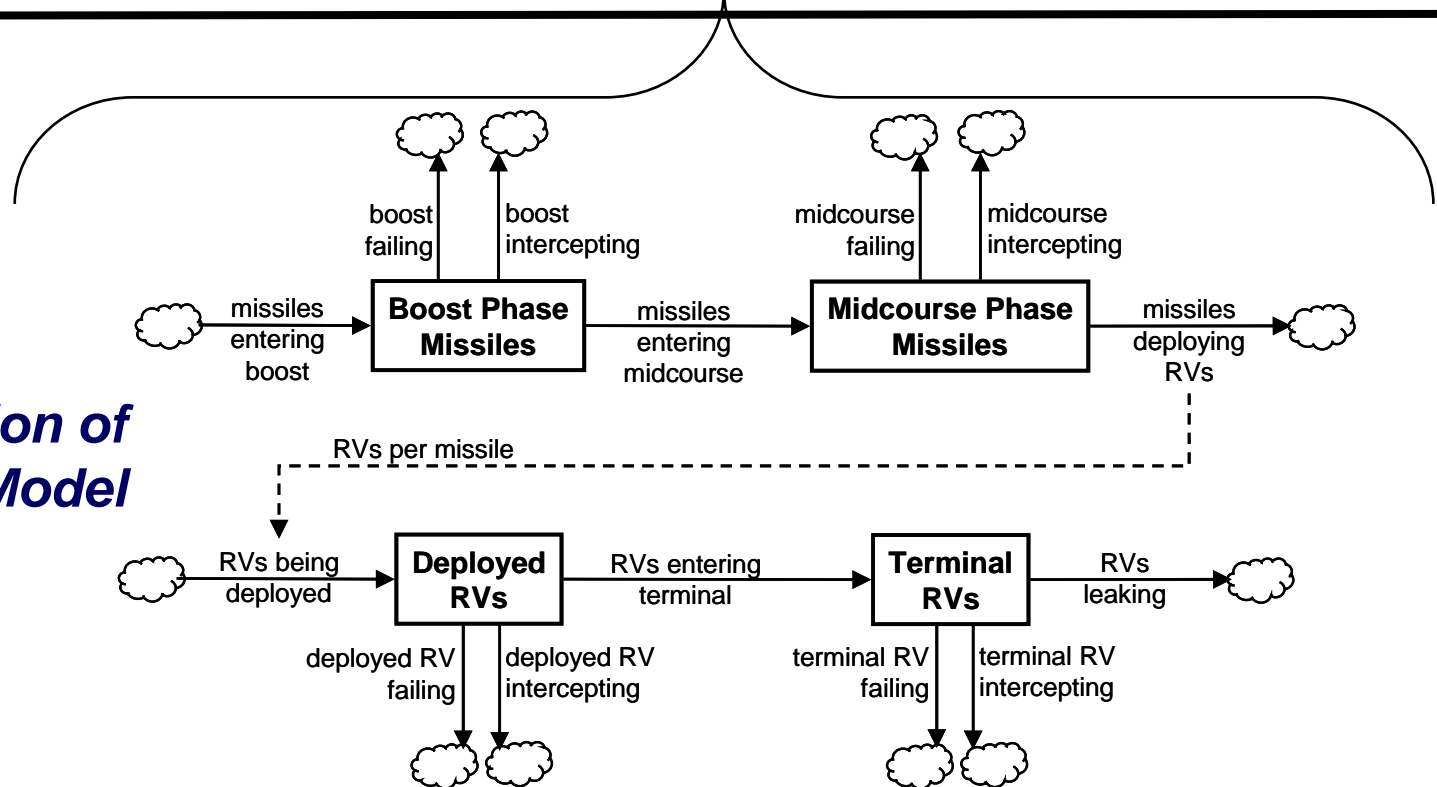

Preemptive Goal Program: Solution from Addition of Goal Constraint

		Systems		Capability Levels		
		Platform 1	Platform 2	C1	C2	C3
Solution	S3	1	2	30	10	20

Note: The new solution meets all the goals with **good**, not **best**, values across the goals.

SecDef JCA Memo

“Although I recognize this lexicon needs further development, I encourage you to begin using the Joint Capability Areas where appropriate. The attached action items address specific taskers.”

- Incorporate the JCAs where appropriate across acquisition activities including the DAB, capability roadmaps, and technology investment decision opportunities
- Incorporate the JCAs as appropriate into future Defense Planning Scenarios (DPSs) and Strategic Planning Guidance (SPG)
- Refine Tier 2 layer of capabilities lexicon as required to provide sufficient detail to enhance usefulness
- Use the capabilities lexicon in the continued evolution of the Joint Capabilities Integration Development System (JCIDS) where appropriate
- Integrate the capabilities lexicon into the future Universal Joint Task List (UJTL)
- Incorporate the JCA into evolving Global Force Management (GFM) and Joint Force Provider (JFP) initiatives where appropriate

JCS

THE SECRETARY OF DEFENSE
WASHINGTON, DC 20301-1000

MAY 6 2005

MEMORANDUM FOR SECRETARIES OF THE MILITARY DEPARTMENTS
CHAIRMAN OF THE JOINT CHIEFS OF STAFF
UNDER SECRETARY OF DEFENSE FOR ACQUISITION,
TECHNOLOGY AND LOGISTICS
UNDER SECRETARY OF DEFENSE FOR POLICY
COMMANDERS OF THE COMBATANT COMMANDS
DIRECTOR PROGRAM ANALYSIS AND EVALUATION

SUBJECT: Operational Availability (OA)-05 / Joint Capability Areas

Thank you for your participation in the Joint Force Capabilities Assessment sub-study under Operational Availability-05. Your input and comments during the study clearly enhanced the outcome of this important effort.

As an integral part of the evolving Capabilities-Based Planning process, and in response to guidance in the Strategic Planning Guidance, the study developed 21 Joint Capability Areas representing the beginnings of a common language to discuss and describe capabilities across many related Department activities and processes.

Although I recognize this lexicon needs further development, I encourage you to begin using the Joint Capability Areas where appropriate. The attached action items address specific taskers. A copy of the briefing is included for your information.

Background Study Guidance

The Problem Today

If you want to answer...

• What? How Much? When? Then...

At the Department level, you need to:

- Elevate the discussion above the platform and "single solution" level
- Communicate consistently, with a shared vision and common language
- Have a single set of facts and assumptions to guide analysis and decisions

- Currently no linkage to commonly defined Joint capabilities
- Difficult to do cross-Service capability trades
- Services define Joint capability needs

As-Is
To-Be

- Joint community defines Joint needs
- Allows Services to map to Joint capabilities
- Facilitates analysis by capability

FY 06-11
Strategic Planning
Guidance
(Mar 04)

OA-05 Study

Joint Force Capabilities Assessment (JFCA) Sub-Study
language: ***“identify, organize and prioritize capabilities required for the Defense Strategy.”*** (S: 30 Jan 05)

- Reach a common definition of “capability” and associated terms
- Identify capability categories (functional and operational)
- Develop a hierarchy of capability categories that support:
 - Cross Service trades
 - Strategy guidance articulation
 - Inclusion of operational and support capabilities
 - Gap analyses and evaluation of program contributions to the capability
 - Assessment of program execution
- Develop a compatible planning and programming framework
- Foster a “capabilities culture” that considers divestiture in tandem with initiatives; integrates risk; considers near and far term needs; is fiscally responsible

(U) Joint Force Capabilities Assessment. Taking into account the modular forces and capability equivalency substitution framework tasked later in this document (see Section IV, Global Force Management), the OA 05 study will identify, organize, and prioritize capabilities required for the Defense Strategy. The identification of joint force requirements will be based on both warfighting analyses and rotational methodologies.

Recent Strategic Direction - 2006 QDR & SPG

- Reaffirms Department's shift from Threat-Based Planning to Capabilities-Based Planning
- Links JCAs specifically to joint capability portfolio concept
- Emphasizes the need to manage the Department via joint capability portfolios to meet President & Combatant Commanders' needs
 - Initial effort includes 3 JCAs
(*Joint C2, Joint Net Centric Operations, Joint Space Operations**)
 - Plans to expand to other JCAs
- Lauds PACOM's efforts (Linking Plans to Resources (LPTR)) to map resource needs to plans and operations
 - Working to expand program to enable Department-wide assessment of JCAs

* DAWG deleted Space Operations; added Battlespace Awareness & Joint Logistics

(Survey Question #1) Organizational Activity

- 130 respondents of which 109 use JCAs

- COCOMs – 60
- Services – 28
- OSD – 2
- Joint Staff – 19

(Survey Question # 2 / 2a)

How an organization benefits from and uses JCAs

- JCAs being used across all activities
- Cross-talk between activities beginning
- Preponderance of use seems to be in requirements and portfolio management
- Use is based on utility rather than DoD directive

**Written comments discussing how JCAs have limited
an organizations use and suggestions for improvement
(Survey Question #2b)**

- 75 survey respondents had written comments
- 43% of respondents indicate JCAs need additional detail (*too general + decompose*)
- Reduce overlap and decompose comments mirror check blocks
- No common theme for “add / delete / modify”. All address individual “issues of the day”
 - Combating WMD
 - IED Defeat
 - Force Readiness
 - Homeland Defense binning

(Survey Question #3)

Key areas for improving JCAs

Total responses - 130
Users of JCAs - 109

COCOMs
responses - 60

Services
responses - 28

OSD
responses - 2

Joint Staff
responses - 19

- Overwhelming response for reducing overlap and improving level of detail

- 61% say reduce overlap

- 61% say decompose further

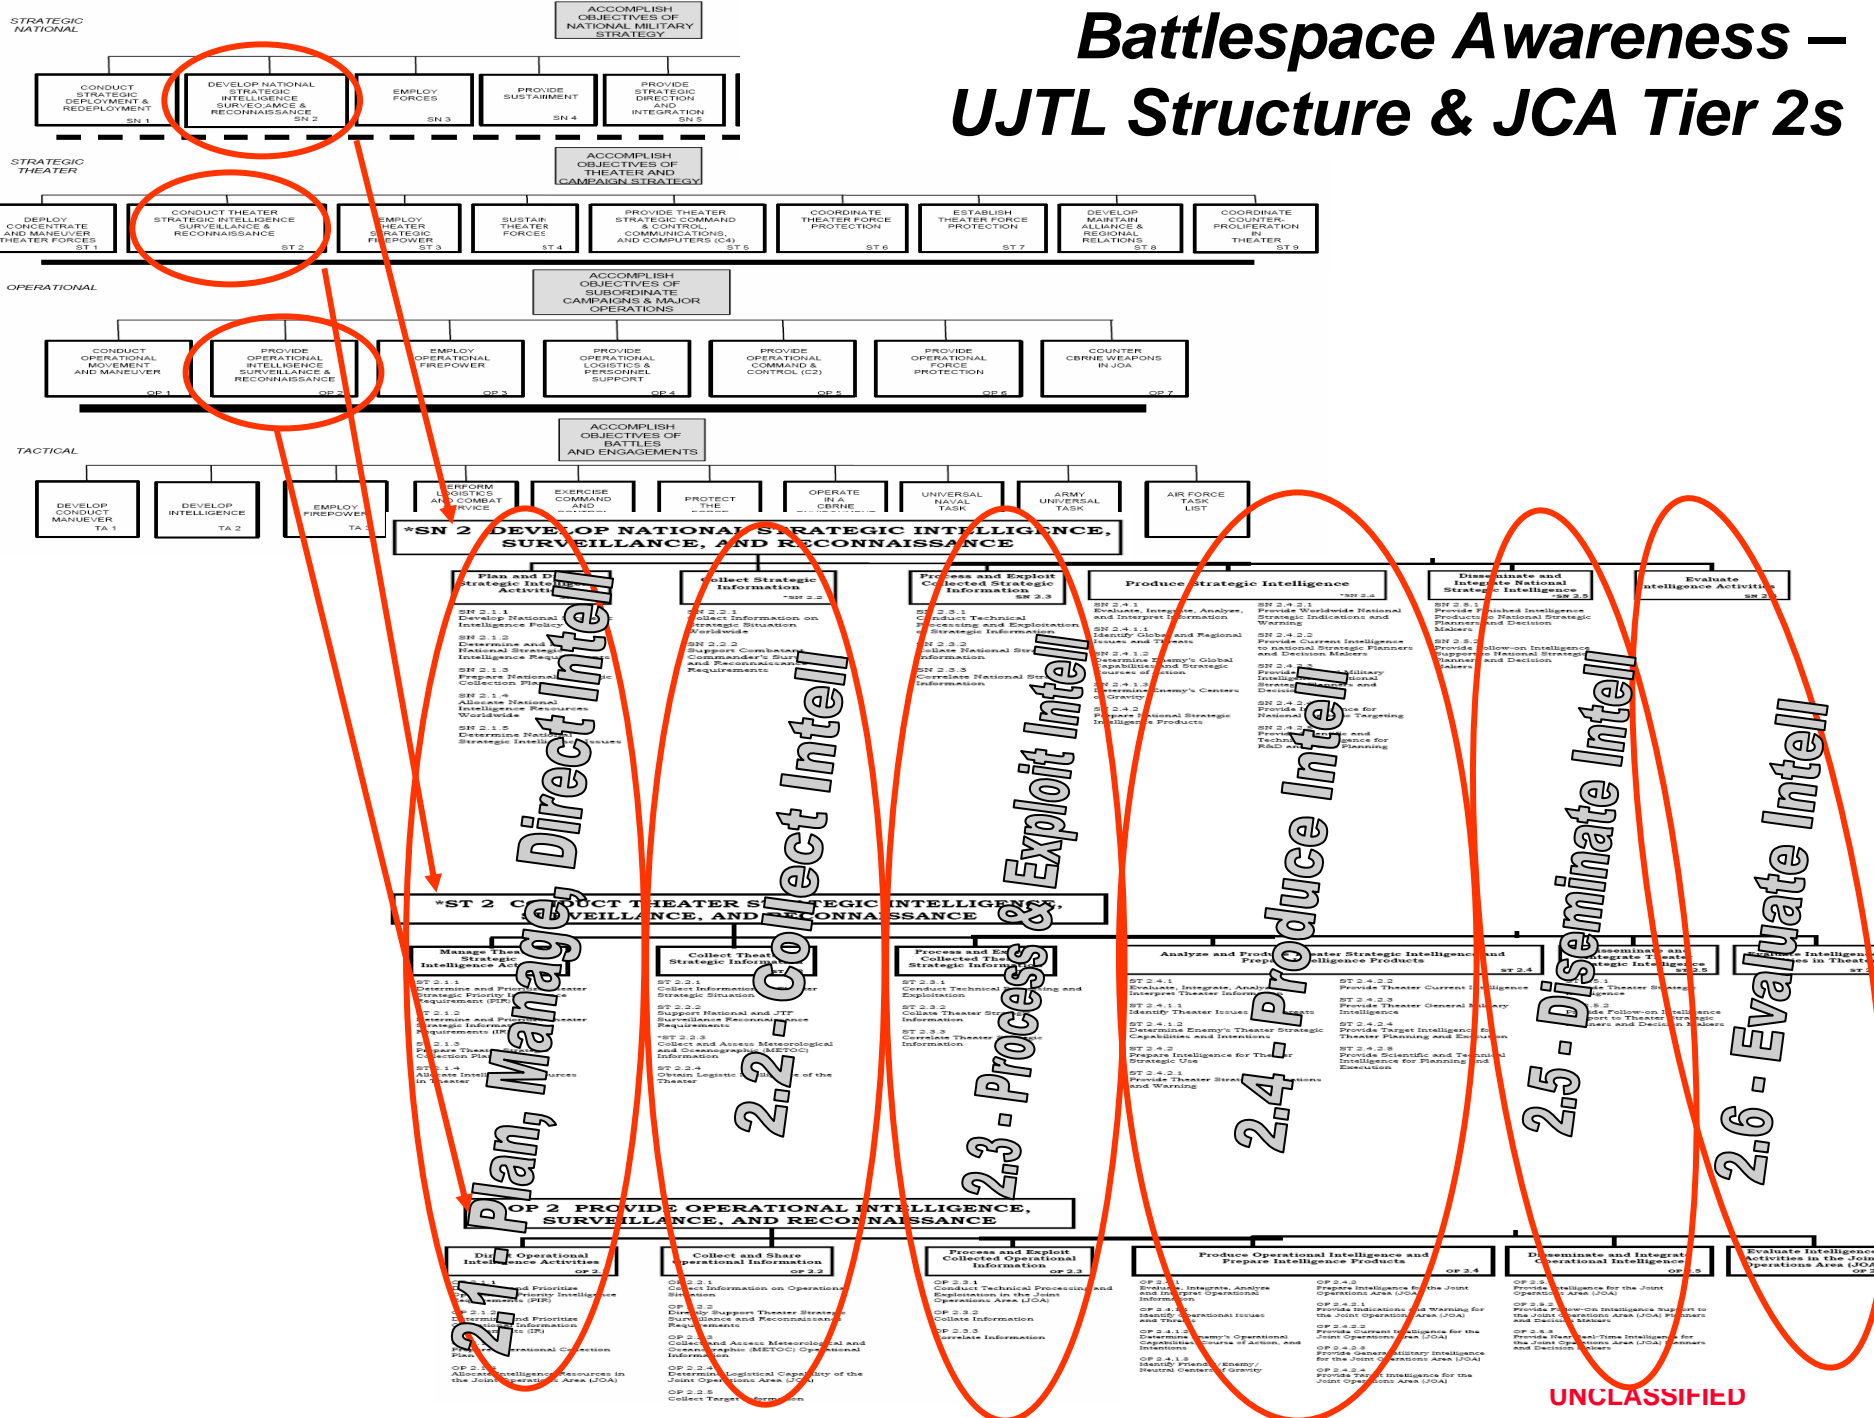

- Majority of responses in "Other" amplify first two responses (see next chart)

Written comments suggesting improvements to the JCA Framework (Survey Question #3)

- 56 survey respondents had written “*specify / explain*” comments for question 3
- Reduce overlap and decompose comments mirror in check blocks
- Identifies a need for a guidance and educational effort
- Comments regarding adding JCA were “issues of the day” type

Experience and Analysis on JCA Use

- **Senior Leaders**

- Too complex; fewer is better
- Reduce overlap; endorsed way ahead

- **COCOMs**

- Eliminate redundancy
- Align functionally
- Decompose to support planning & IPL development; need more granularity to express needs
- Eliminate disconnects between COCOM and JS binning
- Too many non-warfighting capabilities fall outside JCAs

- **OSD / AT&L**

- MMT indicates overlaps in over 60% of JCAs
- Reducing overlaps would increase use/effectiveness

- **OSD / PA&E**

- Any framework can be used; needs stability

- **JS**

- Overlaps create ambiguity when binning gaps
- Meaningful work will occur at Tier III
- Many capabilities do not fall neatly within current JCAs

- **Services**

- Eliminate redundancy
- Decompose to support refined planning & requirements development

- **Planners**

- Decompose to support planning (Strategy to task)
- Stabilize the framework

“...Grab bag of capabilities, missions and functions defined by analytic and bureaucratic imperatives.”

Activity Overlaps Among Original JCA Tier1

- Every JCA shows overlap with one or more other JCAs
 - 50% or more shared activities
- Over a third of the time, two JCAs share 50% or more activities

AT&L JCA Assessment

- Using MMT cross-referencing function, we compared capabilities called out for each Tier 1 JCA
 - Percentage of shared activities reflects relationships among different capability areas

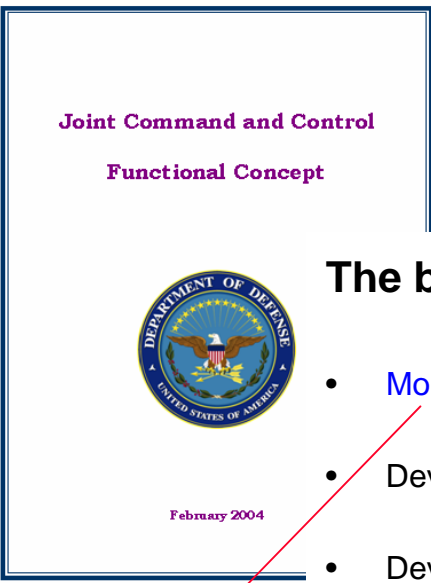

- JCAs are mapped to operational activities
- Activities mapped to the Tier 2 JCAs are rolled up under Tier 1
- This mapping can be used to cross reference activities mapped across the 21 JCA Tier 1

- Count of activities that map to each JCA
- Count of activities that map to both JCAs
- Percentage of activities mapped to Joint Air Operations JCA which are also mapped to Joint Access Denial JCA
- A higher percentage of shared activities indicates a stronger relationship between the JCAs

	Count	Defense Support of Civil Authorities	Joint Access & Access Denial Operations	Joint Air Operations
Defense Support of Civil Authorities	82

Headquarters U.S. Air Force

Fly – Fight – Win

Precision Strike Association Winter Roundtable

Application of ISR Capabilities to Tighten the Kill Chain: USAF Perspective

Colonel Dash Jamieson
Director of ISR Transformation, HQ USAF

ISR Effects

Changing Focus

- **ISR has always been about the kill chain**
 - Artillery spotting
 - Roots of airpower
- **20th century – Hitting Targets**
 - Anywhere, anytime
- **21st century – Determine and Assess Effects**
 - Kinetic or non-kinetic

MK 84 class bomb, Med Alt

The Prominence of ISR Operations

- **Not just the enemy or type of war**
 - **Non-state actors, Irregular warfare**
- **Expectations**
- **Desert Storm: 99% of sorties had assigned targets**
- **OIF: 99% of sorties take off w/unknown target**
- **Requires flexibility**
 - **Extremely netted operations**
 - **Global effects**
 - **Minimal footprint, risk**
 - **Projects power, not vulnerability**

Optimizing the Kill Chain

< 2 minutes

“Interoperability is all about what capabilities I have that can make your operations better. Interdependence is all about what you need done that you can’t live without, (and) my capability is the only capability you have.”

General Ronald E. Keys

Predator Video

FRIENDLIES

SNIPER

Fly – Fight – Win

The Wave of the Present

How Do We Improve Today?

- **UAS role surpassing expectations**
 - **Capability, versatility**
 - **Value for cost**
 - **Reliability, maintainability**
 - **Significantly reduce risk**
- **Deputy SecDef Memo 13 Sep 07**

F2T2EA...and E Again

Fly – Fight – Win

ISR Inventory Evolving

- Paradigm shift in terms of iron
- Legacy ISR Aircraft: LD/HD won't be fixed through procurement
- Mission Migration From Manned To Unmanned
 - Deliver wide range of kinetic and non-kinetic effects
 - Increased ranges, loiter times, payloads with decreased risk and footprint

- Sensor-Shooter line blurring
 - UAS adding attack capability
 - Next gen aircraft incorporate ISR capability

Fly – Fight – Win

F2T2EA to F3

**Predator: 600+ hours looking
for and tracking al-Zarqawi**

+

**2 F-16Cs: 10 minutes of
force application**

=

Fly – Fight – Win

Self-Imposed Hurdles

Overcoming Semantics

- Strategic – Operational – Tactical
 - Effects not platforms
- Sensor – Shooter
 - Nomenclature constricts potential
 - Misperceptions
 - F/A and *non-traditional ISR*
 - RQ can't shoot
- ISR: Support or Operations?
 - ISR *Is* Ops...the *Hunter* in Hunter-Killer

ISR Capabilities

- Result in a value-added effect

- Intelligence cycle as a lens

- Traditional view

- Transformational view

- Assessment

Cross-domain integrated ISR optimizes effects chain

Fly – Fight – Win

Missiles & Weapons Market in Perspective

Jeff Ryder
BAE Systems, Inc.
January 23, 2008

Introduction

- 1 US defense budget outlook
 - Scenarios
 - Drivers
- 2 Missiles & Weapons budget outlook
 - Missiles, PGW, munitions and ordnance
 - Market forecast
- 3 Trends to reorient capabilities
 - Capability gaps
 - Future scenarios

Approach

- GEIA: interview based, cross-industry analysis
- Defense budget analysis

The defense budget is approaching record-breaking levels

DoD Budget Authority
Current and Constant FY08 \$B

Source: DoD Greenbook

The budget is currently “off cycle” – a return to historical cyclicity would suggest a decline is imminent

DoD Budget Authority
Constant FY08 \$B

FY08

Source: DoD Greenbook

A number of factors shape the budget outlook – threat perception, politics and economics matter most

Primary budget-shaping factors:

- Threat
- Politics
- Economics

Factors that pressure the budget:

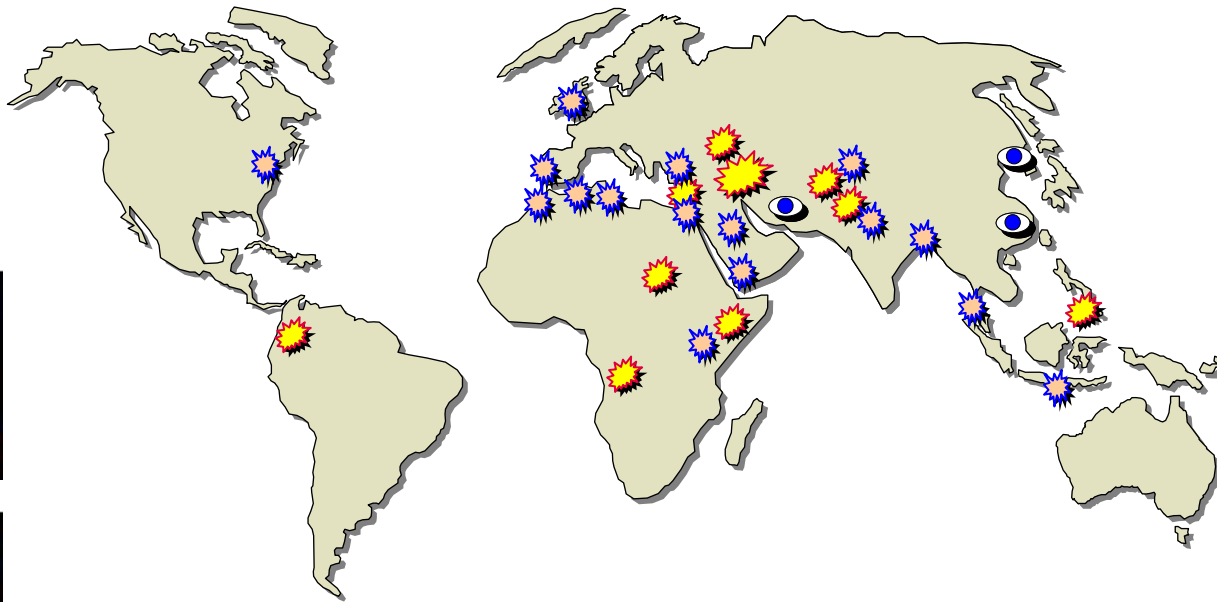

- Withdrawal from Iraq
- Increase in mandatory spending
- Popular disapproval of defense spending

Factors that buoy the budget:

- High Optempo
- Rising Operations & Support (O&S) costs
- Reset requirements
- Investment requirements

The security environment has become increasingly complex

Global Security Environment

A key economic/fiscal factor in the defense forecast is the rapid growth in mandatory spending accounts

**Federal Spending
by Major Category 2006-2017**

**Mandatory Spending
By Account 2006-2017**

Source: CBO projections, August 2007

Future spending will likely remain high by historical comparison

US Defense Budget Scenarios vs. Budget Benchmarks
Budget Authority, Constant \$FY08

Source: DoD Greenbook FY08, GEIA, BAE Systems, Inc.

Upwards budget pressure is driven by the inexorable rise in Operations & Support costs

Spending per Soldier: MilPers vs. O&M
Budget Authority, Constant \$FY08

- O&M drivers
 - High Optempo
 - Aging fleets
 - Increasing complexity of weapons
 - Rising fuel costs
 - Increasing use of industry contractors
- MilPers drivers
 - Force augmentation (+92,000)
 - Healthcare (costs doubled 2000-2005)
 - Rate of military retiree and dependents increased 6.0% per year 2001-2005
 - Upwards pressure on compensation due to private-sector benchmarking

- Risk that O&S costs will erode investment accounts
- The only historical means to curb O&S growth has been to reduce end strength

Investment spending will decline in real dollars

Investment = Procurement + RDT&E
Budget Authority, Constant \$

- ↑ Current investment funding forecast insufficient to fully fund current portfolio
- ↑ Cost increases, (historically 15%) could add a \$25B burden
- ↑ May see additional Service requests
- ↓ O&S budget intrusion
- ↔ Portfolio trades will continue, placing premium on program performance

The Services indicate investment prioritization on platforms

Service Investment Priorities

Service	Investment Priorities
Air Force	<ul style="list-style-type: none"> • F-22 • KC-X • C-17/C-5 • CSAR-X • JSF • LRS • SBIRS • TSAT • Space Radar
Navy	<ul style="list-style-type: none"> • Shipbuilding (CVN-78, DDG-1000, LPD-17, LHA(R), Virginia) • Aircraft modernization (JSF, F/A-18 E/F, EA-18G, BAMS, MMA/P-8A)

Service	Investment Priorities
Army	<ul style="list-style-type: none"> • FCS • FMTV/JLTV • Helicopter modernization • MRAP • Force augmentation
Marine Corps	<ul style="list-style-type: none"> • JSF • Expeditionary Fighting Vehicle (EFV) • Light Armored Vehicle (LAV) • Amphibious shipbuilding • V-22 • CH-53K • Force augmentation

Missiles & Weapons budgets will decline over the next decade, with emphasis on upgrades as opposed to new starts

- Missiles & weapons budget will decline over the forecast period
 - Pressure on topline and between Services
 - Supplemental war funding expected to drop off in near term
 - Several major programs have/will be winding down
 - Concern weapons will become bill payer for platforms
- Spending profile shows few new program starts
 - Emphasis on improving and upgrading legacy systems
 - Iraq/GWOT driving primary requirements and capability gaps
 - Replenishment for expended ordnance and fatigue
 - Force Augmentation (Army, USMC) in near term

Market Forecast: By Military Service

Source: GEIA

Market Forecast: By Segment

Source: GEIA

Market Forecast: Procurement vs. RDT&E

Source: GEIA

Evolution of precision engagement drives perception of missiles and weapons versus other defense investment segments

1943

1500 B-17 sorties
9000 bombs
3300 ft CEP
One 60' x 100' target
WWII

1970

30 F-4 sorties
176 bombs
400 ft CEP
One Target
Vietnam

1991

1 F-117 sortie
2 bombs
10 ft CEP
Two Targets per Sortie
Desert Storm

2003

1 B-2 sortie
80 bombs
<20 ft CEP
80 Targets per Pass
All Weather

Accuracy

Source: USAF

Despite today's battlefield challenges, US forces are using existing weapons for desired effect...

...the real issue is targeting and networking

Iraq is driving many of the capability requirements

- Moving targets, fleeting targets
- Precision engagement in all weather
- Urban Close Air Support (CAS)
- Shortened kill chain
- Improved reliability
- Low collateral damage
- Non-lethal effects
- GPS interrupted / denied environments
- Hard and Deeply Buried Targets (HDBT)
- O&S assumptions built into design due to captive carry

Current Environment: Key Technologies

- Multi-mode seekers
- Datalinks
- Sensor fuzing
- Flexible warheads, scalability
- Hypersonic
- Smart fuzes
- Directed energy

Smart technology insertion needed to achieve cost-friendly, balanced capability portfolio

Source: GEIA

Numerous potential opportunities...

Near term <2010

- JAGM
- Smart artillery, mortars, rockets, tank rounds
- Direct attack moving target capability (DAMTC)

Mid-Term 2010-2015

- FCS Precision Munitions
- Weapons for UAVs
- Hard and Deeply Buried Targets
- Tactical Laser
- High Power Microwave
- Over-the Horizon Anti-Surface Warfare Weapons
- Swarm Ship Defense
- Joint Dual Role Air Dominance Missile (AA, AG)
- Long-range strike weapon
- Next-gen Torpedoes
- Non-Lethal Effects

Far-Term 2015+

- Directed Energy
- Future Cruise Missile
- Electro Magnetic Rail Gun
- Autonomous Target ID

...but no clear roadmap

Impact of a “Global Terrorism” vector

- Emphasis on CAS in any environment with small, high-speed, precision weapons
- Requirements may expand for:
 - Fleeting target capability
 - Sensing and discriminating low-profile targets
 - Networking of all ISR platforms to rapid strike
 - Emphasis on speed over range
 - Low collateral damage
 - Scalability
 - Precision in all environments
 - Directed energy for non-lethal effects
 - Loitering weapons
 - Weaponizing UAVs

No appreciable difference versus baseline budget, though requirements may shift

Impact of a “Multipolar Alignment” vector

- Technology development to prepare for near-peer challenge:
 - Increased emphasis on baseline requirements (i.e. moving targets, all weather, networked weapons, etc.)
 - Emphasis on range as well as speed – fast, standoff weapons
 - Over-the horizon surface warfare
 - Advanced torpedoes
 - Cruise missiles
 - Hypersonic propulsion technology
 - Directed energy for force application / protection
 - UCAV weapons

**Budget increases, though missiles & weapons
will continue to compete with platforms**

Potential disruptions

- Directed Energy
 - DE expected to be complementary to kinetic weapons
 - Technology development may come in advance of CONOPS / policy evolution
 - User pull required
 - ABL shutdown (FY 09) and ATL, HEL tech demonstration programs may indicate how quickly DE evolves operationally
- Cyberspace
- Convergence with or divergence towards other domains and sciences
 - Nano
 - Robotics
 - Bio

Messages to Industry

- Contractors are doing a good job developing technology and addressing capability gaps
- Make the dumb weapons smart and the smart weapons cheap
- Don't try to add capability when it's not needed
- Emphasize realistic cost estimates

Thank You

The Joint Capabilities Integration & Development System (JCIDS)

Demonstrating Relevance to Decision-Makers

14 January 2008

Lt Col Robert “Prince” Valin

Joint Staff (J8), Force Application Engagement Division

Disclaimer

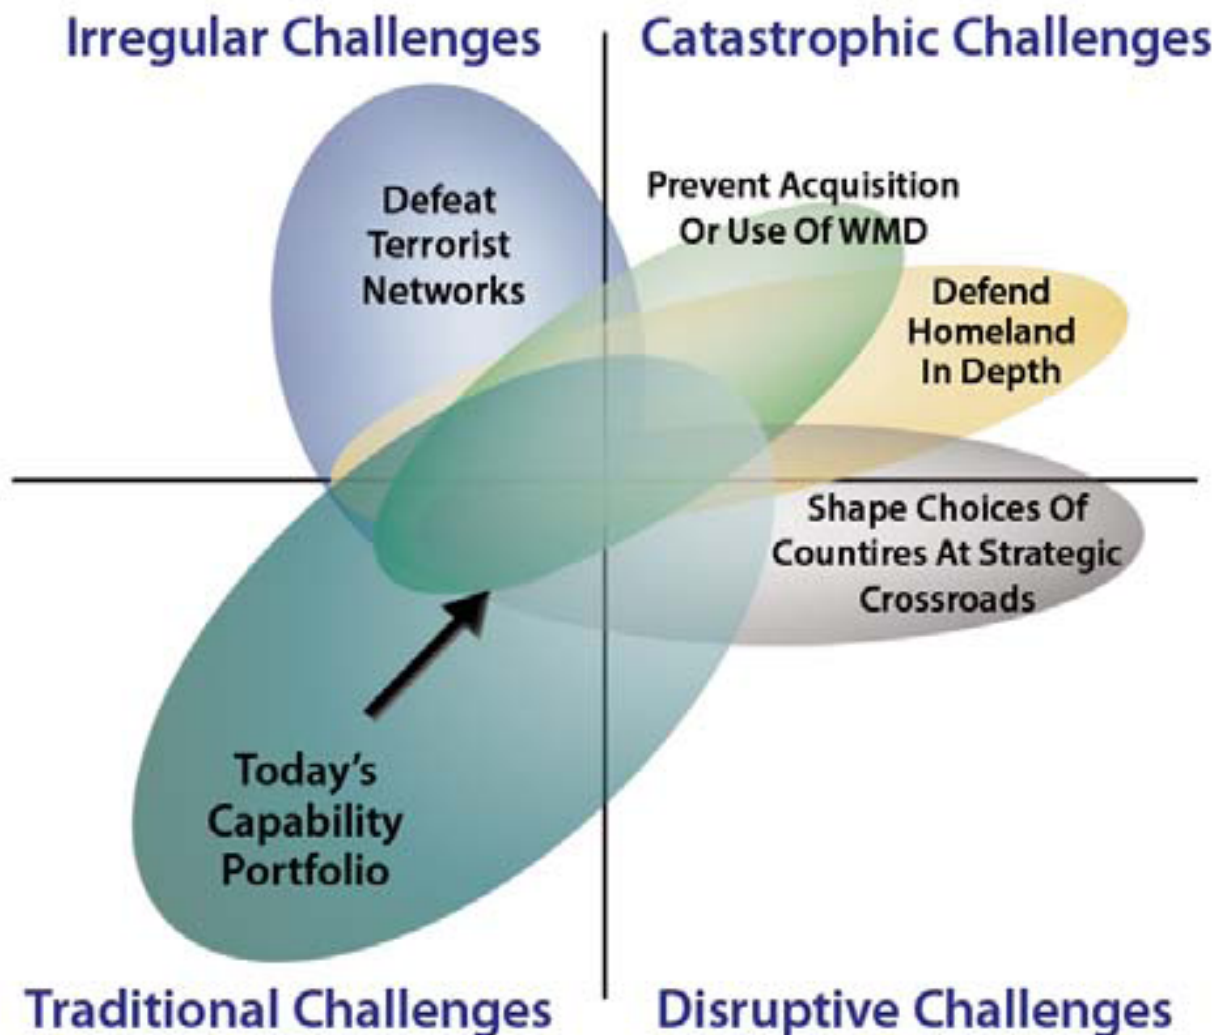

- The views expressed here are my own and are not necessarily representative of DOD, the Joint Staff, or the Air Force

- 2002 SecDef Memo
 - “... clear it [the requirements system] is broken ... inevitably continues to require things that ought not to be required, and does not require things that need to be required.”
 - Priority theme ...
- Change to Dynamic, Unpredictable Environment
 - Previous -- Cold War focus, singular threat source
 - New world order – threat is a “Hydra”
 - State and Non-State sources
 - Threats in every corner of the world
- What is the basis for saying “yes” to Program X, and “no” to Program Y?

National Defense Strategy (2005)

“Capabilities-based planning focuses more on how adversaries may challenge us than on whom those adversaries might be or where we might face them. It focuses the Department on the growing range of capabilities and methods we must possess to contend with an uncertain future. It recognizes the limits of intelligence and the impossibility of predicting complex events with precision. Our planning aims to link capabilities to joint operating concepts across a broad range of scenarios. The Department is adopting a new approach for planning to implement our strategy. The defense strategy will drive this top-down, competitive process. Operating within fiscal constraints, our new approach enables the Secretary of Defense and Joint Force Commanders to balance risk across traditional, irregular, disruptive, and catastrophic challenges. ***We will operationalize this strategy to address the spectrum of strategic challenges by setting priorities among competing capabilities.***”

“... the Department is shifting its portfolio of capabilities to address irregular, catastrophic and disruptive challenges while sustaining capabilities to address traditional challenges.”

The DOD Missions

Steady State

Surge

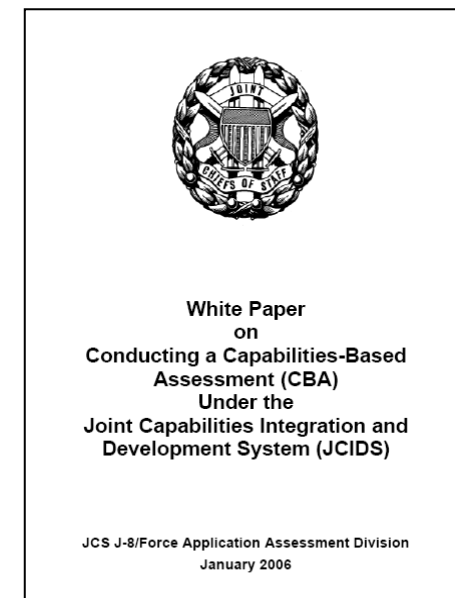

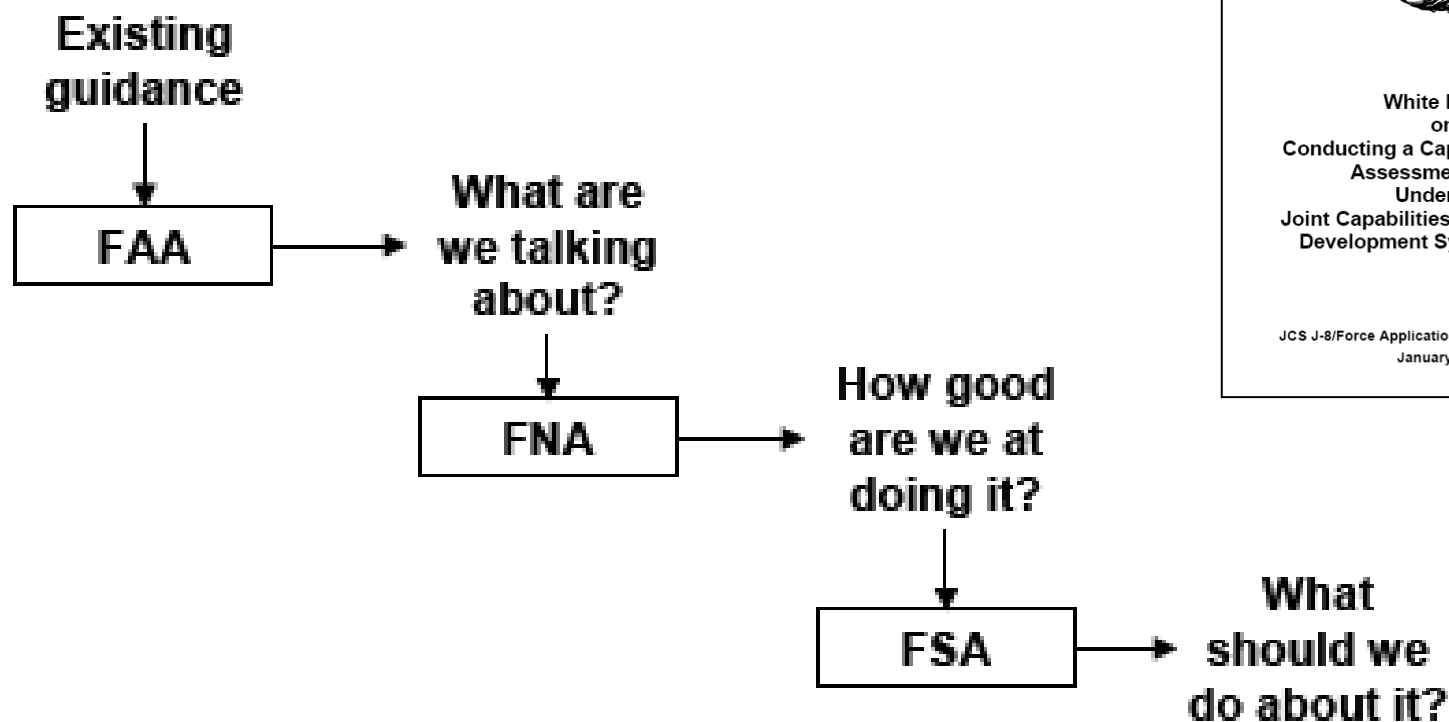

The Analytic Agenda

	Steady-State	Surge
Current	Plans (OPLANs, CONPLANs, etc.)	
Mid-Year (+7 years)	Steady-State Scenarios SSSPs	Major Combat Operations Scenarios MCOs (WD, SDTE)
Out-Year (+20 years)		Swiftly Defeat the Efforts

- Scenario Level – broad outline developed by OSD(P)
- Multi-Service Force Deployment (MSFD) data – detailed CONOPS, developed by Joint Staff with all relevant DOD organizations
- Analytic Baselines – specific details approved for DOD use, approved by OSD/PA&E

- Finding a “need” for Program X is not enough ...
- Need should be evaluated FIRST
 - Assess utility against (many) potential threats
 - Is the threat “grave”? How important is the need?
 - When do we need it?
- Potential solutions need careful attention
 - Alternative solutions (to include non-materiel)
 - Offset consideration

Is doing nothing a reasonable alternative?

CBA Guide available at <http://www.dtic.mil/futurejointwarfare/>

- FAA defines the military problem being addressed and specifies evaluation criteria as tasks, conditions, and standards (i.e. scope)
 - Determine what will be evaluated (tasks), the relevant operational environments (conditions), and how well, or to what degree the joint force must do them (standards – proficiency and sufficiency)
 - Analogy: What are the course objectives; prepare final exam
- The FNA assesses how well DoD achieves the military objectives
 - Evaluate how well the war fighter will do the tasks, to include with non-traditional means. Results should specify gap impact on objectives (e.g. minor inconvenience, ‘we lose the war’, or something in between)
 - Analogy: How did the students do? Exam results?
- “Capability gaps” come in two flavors:
 - Proficiency – the ability to do the task in the specified conditions and to the specified standards
 - Sufficiency – the ability to do the task as much/often as DoD needs

- Given that a gap exists (from FNA), what are the most promising solution paths available?
 - “Banded” solutions encouraged!
 - Solution maturity (tech, manufacturing, etc.) must be evaluated
 - Cost effectiveness, risk must be evaluated
- Two potential documentation paths
 - Initial Capabilities Document (ICD) – Materiel “heavy”
 - DOTMLPF Change Request (DCR) – Non-materiel “heavy”
- ICD may lead Analysis of Alternatives (AoAs), two documentation paths:
 - Capabilities Development Document (CDD), if material development required
 - Capabilities Production Document (CPD), if solutions is “off-the-shelf”

- *Critical* Decision Point
 - Gap Identified
 - Potential Solution Paths Identified
 - Question: Should DOD apply resources to pursue a solution?
 - Viable answers require three big DOD tribes to agree!
- The CD Experiments
 - GS-Raid (Global Strike Raid)
 - JLTm (Joint Lightweight Tactical Mobility)
 - IAMD (Integrated Air-Missile Defense)
 - JRSG (Joint Rapid Scenario Generation)

Capabilities Based Planning – The Big Picture

Criticism**Response**

- Not Responsive Enough

Transition from RGS (3+ years)

JRAC

Increasingly flexible (rules)

Scrutiny will remain

- Ties to “effects-based operations” and/or Joint Concepts

- Capabilities can’t be tied to specific adversaries or places
- Too ethereal to substantiate real-world application

“Effects” and EBO not the same

Focus on need, not solution-based

Joint Concepts only help the “how”

- Ineffective Prioritization

- First attempts tied to “gaps” as proposed by COCOMs, Services
- Impact of DOD mission objective attainment minimal, subjective
- Current efforts to prioritized Joint Capability Areas (JCAs)

Guilty!

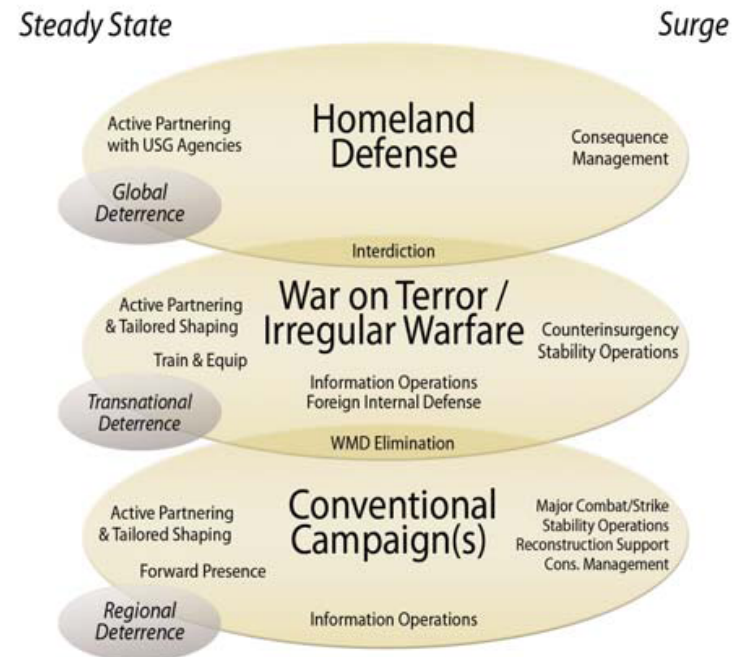

Way-Ahead TBD – hopefully based on mission priority, objective attainment, and time of need

Useful for trades

Not helpful in roll-ups

Prioritization Concept

- 1 to N, or Trades?
- Gap “grades”
 - Time
 - Impact to scenario
 - Scenario importance
 - How many scenarios?
 - Weighted importance?
 - Evaluation time – updates?
- Previous concept issues

- Good bet
 - Emphasis on “Interdependence”
 - Beyond interoperability
 - Conflict with some established doctrine/concepts, particularly when “organic” solutions are offered to address enterprise-wide capability gaps
 - Logistics (e.g. airlift)
 - C4ISR (e.g. Intelligence collection, Information dissemination)
 - Electronic Warfare
 - More reliance on Service-based analysis (within natural domains)
 - Lower tolerance for organic capabilities beyond Service core-competencies (e.g. stovepipes, Service-unique programs)
 - Format changes (ACAT or JPD level views)
- Probable
 - Clarified “roles and missions” for COCOMs, Services, and especially Reserve Components
 - More focus on prioritization of individual capability gaps, enabling “trades” – requires “top-down” weighting of DOD missions
 - Less focus on prioritization of capability areas

BACKUP

- LtGen (Ret) Van Riper (11 Dec 05)
 - “... today JCIDS evidences all the signs of an overly bureaucratic and procedurally focused process ...”
 - “... damaged the military lexicon ...”
 - “... a truly useful military operating concept only results when there is a need to solve a significant problem ... perform some military function better or in a new way.”
 - “a ‘revolution in military affairs’ or a ‘military transformation’ ... now serve as a mantra for those advocating advanced technologies”
 - “... concepts to justify directly ... every programmatic decision ...”
 - “seem to serve more as a means to slow innovation”
 - “lack of intellectual content in emerging joint concepts ... assigning our best thinkers to infuse content into vacuous slogans ... none more egregious than the idea of ‘effects-based operations’”
 - “Effects-based Operations ... not useful against ‘interactively complex systems’” (e.g. economic and leadership systems)
 - “... senior joint and service leaders must clearly identify the most significant problems ...”

The Munitions Requirements Process (MRP)

- Tied to PPBE
 - Two-year effort
 - Process: A Simple View
 - OSD Policy and AT&L determine scenario list for enhanced review/analysis
 - DIA develops threat (near-term and future)
 - COCOMs develop near-term plans for listed scenarios
 - Joint Staff develops future plans for listed scenarios
 - Services develop individual munitions requirements
 - Risk Assessments by Services, COCOMs, Joint Staff, and OSD
- Tied to QDR's Force Planning Construct
 - Traditional surge scenarios tend to be munitions “drivers”
 - Service munitions investments driven by needs in defined scenarios
- Munitions are typically not bought to full requirement
 - Shorter lead-time than many other needs, but not insignificant
 - Lesser impact on other force elements (force size, readiness, etc.)

QDR: Operationalizing the Strategy

- Defend the Homeland
 - Steady-state – detect, deter, and if necessary, defeat external threats to the U.S. homeland, and enable partners to contribute to U.S. national security.
 - Surge – contribute to the nation's response to and management of the consequences of WMD attacks or a catastrophic event.
- Prevail in the War on Terror *and* Conduct Irregular Operations
 - Steady-state – deter and defend against external transnational terrorist attacks, enable partners through integrated security cooperation programs, and conduct multiple, globally distributed irregular operations of varying duration.
 - Surge – conduct a large-scale, potentially long duration irregular warfare campaign including counterinsurgency and security, stability, transition and reconstruction operations.
- Conduct and Win Conventional Campaigns
 - Steady-state – deter inter-state coercion or aggression through forward deployed forces, enable partners through theater security cooperation, and conduct presence missions.
 - Surge – wage two nearly simultaneous conventional campaigns (or one conventional campaign if already engaged in a large-scale, long-duration irregular campaign), while selectively reinforcing deterrence against opportunistic acts of aggression. Be prepared in one of the two campaigns to remove a hostile regime, destroy its military capacity and set conditions for the transition to, or for the restoration of, civil society.
